VAROL SCREEN WASH

Super concentrated screen wash

VAROL SCREEN WASH is a blend of highly active detergents and fast drying alcohol based solvents effective in both the extremes of winter and dry summer conditions. When pre-diluted and added to the wash bottle water reservoir it cuts through grime and insect smears whilst also reducing the likelihood of screen freezing even at the lowest winter temperatures. The end result is always a gleaming, smear-free finish after each jet on the screen.

VAROL SCREEN WASH used in normal temperate conditions, this Screen Wash concentrate can be added to the wash-bottle at just a 1 to 60 dilution with water, whilst under typical British winter wet weather conditions, a dilution of 1 part Screen Wash to 8 parts water is advised. When the most severe sub-zero winter conditions are prevalent, use this product diluted as little as 1 to 1 with water to ensure the wash solution prevents freezing down to as low as -35°C and at this dilution it will even de-frost windscreens.

Key Features

- Quick drying performance
- Effectively removes traffic film and insects
- Can be used in summer and winter down to -35°C
- Will not dull or taint paintwork

Directions for use

- Adjust dilution depending on required performance
- Summer use dilute at 60 parts water to 1 part Varglow Ultra Screen Wash
- Winter use dilute at 8 parts water to 1 part Varglow Ultra Screen Wash
- Sub-zero deep winter (down to -35°C) conditions dilute at 1 part water to 1 part Varglow Ultra Screen Wash

product data sheet

| Typical Data | | |
|-------------------------|-------------------------|-------------------------|
| Parameter | Unit of measure | Result |
| Appearance | Visual | Clear |
| Specific Gravity | g/cm³ | 0.99 |
| Odour | | Soapy |
| Solubility | | Soluble in water |
